

Building Behavioral Expertise in Your School

Teams must consist of:

- An Administrator;
- A general educator; and
- A special educator.

The entire team is required to select one site and attend all six meeting dates.

- Bring a laptop computer; and
- Bring a student case study for whom you would like to develop a behavioral intervention plan.

The Oklahoma State Department of Education has partnered with Dr. Laura Riffel to provide six trainings at three locations in Oklahoma. The purpose is to assist educators in learning:

- The process of gathering data;
- Evaluating the data;
- Using the data to assist Individualized Education Program (IEP) teams in developing appropriate intervention plans;
- Gathering more data to determine if the plan is appropriate; and
- Revising the plan and implementing as needed.

GOAL: To improve student behaviors which will improve attendance and test scores.
